

web01 compromise: chain of custody

Evidence and custody report - Case IR-2026-0001: Web server compromise (demo)

Field	Value
Report	67ecdab8-7853-485e-bd64-6e8ea1e1d44e (family 67ecdab8-7853-485e-bd64-6e8ea1e1d44e), version 1
Status	Signed
Author	Demo Analyst <demo-analyst-4fd261@demo.example>
Data snapshot	2026-10-03T07:43:31.355687Z by Demo Analyst <demo-analyst-4fd261@demo.example>
Approved	Demo Lead <demo-lead-132509@demo.example> at 2026-10-03T07:43:31.531203Z
Signed	Demo Lead <demo-lead-132509@demo.example> at 2026-10-03T07:43:31.577433Z (key ed25519-9ac630fa239978b1)
Case	severity high, status open, opened 2026-10-03T07:43:14.342370Z

1. Scope of this report

Custody of the four evidence items of case web01 compromise (demo): auth.log, .bash_history, capture.pcap and dropper.sh.

2. Handling and verification

Evidence was received into a write-once vault and hashed (SHA-256 and MD5) while it was stored; every item was re-hashed and compared before it was processed. Parsers read copies only and count the records they read against the events they emit. All times in this report are UTC; the original timestamp strings are kept with each event. The tools, parser versions and processing runs are listed below, and the chain of custody of every item is verified (hash chain and Ed25519 signatures) when the report snapshot is taken.

3. Evidence inventory

ID	Name / kind	Source	Hashes	Size	Acquired	Custody
EV-001	auth.log (log)		SHA-256 45fb282c8addca8afd3aa518126f8f5c48d70596cfa6e506dc576588684a ae0e MD5 70e7dc06a3dc86a2a402dccf2dd2fc31	6371	-	verified
EV-002	.bash_history (log)		SHA-256 4a18cc3a49e90feb4f3414b18e907d0938c9b714d0b4f4fbf09f99232f26 074f MD5 ec626e404c7297068bb307937636d257	599	-	verified
EV-003	capture.pcap (pcap)		SHA-256 ba04baab1ceb179144aeb983e79ea2ae868e2c52dd0569a805fdfc1c967f aa22 MD5 41af986f14b72843f6235dfce6769ac8	60909	-	verified

6. Examiner statement

Prepared by the demo analyst; every hash was verified by the platform.

7. Limitations

Synthetic demo evidence; no physical media were involved.

8. Report provenance

This report was rendered from an immutable data snapshot. Re-rendering the snapshot gives the same bytes; the signed manifest lists the SHA-256 of every artifact.
